RestroBridge

Software Features

- Chain Store Management - RestoBridge Restaurant POS Software has Chain Store Management to manage all your outlets from one admin panel in your Head Office
- 3 Steps managing systems : Dine In, Home Delivery, Take Away; with cloud based technology
- Excellent order management & tracking through kitchen order token system
- Managing Inventory and reduction in costs by tracking wastage and theft
- User access control for every outlet for secure operations
- Customize your menu with images in various categories, item recipes, ingredients & its categories etc.
- Restaurant POS software helps to generate various reports like billing reports, KOT reports, Delivery reports, etc. and import it into PDF file & Ms-Excel

Dashboard

The dashboard interface for RestoBridge Restaurant POS Software. It features a top navigation bar with the RestoBridge logo, outlet name, and user information. Below the navigation bar, there are three main sections: Canceled Order, Today's Order, and Today's Payment. Each section contains data cards for different categories, showing values in KWD and counts.

RestoBridge | Outlet Name: Outlet One | Welcome, admin Sincrono

Dashboard | Dine In | Home Delivery | Take Away
